

The NSP Seminars

The following are the core seminars of NSP:

1. the first is [the Freedom Seminar](#). After some 4 years of research, it was finally brought together as a unity in 1983. In a sense with its formulation, it was a discovery; and yet, in and of itself it was to prove to be a powerful teaching tool to the Chongs themselves. By further transderivations and epiphanies they were to learn more and more from it.
2. the second is [the De-Imprinting Seminar](#). It was created and formulated following a powerful critical input from one of their students, Ms Jo Kemp; and for which the Chong's will be forever indebted to her.
3. the third, [the Power Seminar](#) was created and formulated by the Chongs when another student, Tom Wood in 1998 compelled them to do so by virtue of his very significant input to them. For this the Chong's will also be indebted to him forever.
4. The Chong's finally created and formulated the fourth, [the No-Y-ian Seminar](#) in 1999. It is critically an applications seminar.

From each Seminar, every student will get:

1. the knowledge content of the seminar
2. a set of universal general benefits
3. a set of unique personal benefits

At the beginning of each respective seminar the universal general benefits are indexed to the entire class; and at the end of the seminar they are verified and validated in-experience in real time with the class. You can check this event when it took place in one Freedom Seminar class in this video link:

<http://www.neuro-semanticprogramming.com/youtube-videos/youtube-videos-validation-of-all-the-universal-predictions-of-the-freedom-seminar>.

From the same seminar is the verification and validation in-experience of the unique personal benefits confirmed by the student. You can get the confirmation by the video in this link:

<http://www.neuro-semanticprogramming.com/youtube-videos/youtube-videos-validation-of-the-unique-personal-benefits-of-the-freedom-seminar>.

**We truly and sincerely
commend these Seminars to you.**
