I apply to register for this workshop.

Signature

Freedom Seminar

Date

Friday, 1st February 2103
Saturday, 2nd February 2103
Sunday, 3rd February 2103

Time

9.00 AM – 4.30 PM

Location

345 Lakeshore Road, Suite 207
Oakville, L6J 1J5

Freedom Seminar

The creators of this seminar, Dennis and Jennifer Chong, discovered it by a very slow series of apparently disparate accidents.

It seemed that it all began with the horrendous phenomenon of human blaming and its apparent strange connection with the question of WHY. Somehow, in time they seminar stumbled onto an apparent tie with WHY and human expectations and the word SHOULD. And soon, into this complex intruded the terms RIGHT and WRONG.

Then against this background, by accident, they came across the book of Alfred Korzybski. AK, *Science and Sanity*. From this they suddenly realized that they were actually working out the language of the Aristotelian system of Cause and Effect, A, that AK had spoken about in *Science and Sanity*.

With his imprimatur, from 1979 to 1983, they worked to map out the entire language system that AK indexed. When it was done, they realized that its language structures, as a totality, was the Blame Frame, BF. And everyone on this planet thinks by it and uses it in their lives across all human domains – from courtship to enmity, from peace to war, from love to hate, for charm to contempt.

In teaching these language structures to their clients, the benefit they got was to realize how their words could so destructive in their lives, to others and to themselves. Even to think it carried downsides! So . . . their clients fought to gain control over their words and their language.

AK had spoken of the opposite of A that he named the Non-Aristotelian system, \tilde{A} . The creators of this seminar took the only logical step open to them. It was to work out the language structures of \tilde{A} . This was something AK had tried to do but he failed.

It was to take them from 1983 to 1985 to work out the language structures of \tilde{A} . It was seemingly so obvious to call it the No-Y-ian Frame, ~YF. However, in 2011, one of their students asserted that it was better to call it the Freedom Frame,

FF, since by it was the first manifest step of everyone's freedom from the insane thralldom of the BF. His name was Steven Corbeil and everyone and the Chone owe him their gratitude for his insight.

The Freedom Seminar has 23 universal general benefits for those who do it. In fact, at the end of every Freedom Seminar the trainer validates if the predictions about these benefits has been realized in the experience of the registrant. In this web site:

<http://www.neuro-semanticprogramming.com/>

you will find the video that validates this.

The Presenters

Dennis and Jennifer Chong turned their conjoint practice into their research laboratory into the field of human linguistics, semantics, philosophy, epistemology, and ontology. In doing so they became self-taught applied experts in these fields. Their discoveries became the resource base for their co-participation in professional conferences all over the world and lectures to universities. Their articles have been published in professional journals in the English speaking world. Latterly they have been posted in their web site including videos of their case work with clients.

Jennifer and Dennis were given the 2001 Hypnosis Research Award of the National Guild of Hypnotist.

In 2010, Dennis was given a Life Achievement Award by the International Medical and Dental Association for his services and contributions to Hypnosis.

Their 2 most critical contributions in Hypnosis are:

1. their explication of their model on how to get surgical hypnoanaesthesia. It is a work that has the finest and most powerful sanctions and endorsements by these recognized international authorities in the field of Hypnotism, **Daniel Araoz and Robert Beuka, Norma and Philip Barretta, Edgar Barnett and David Gordon.**
2. their model to reverse a cancer whose success was validated by a case in 2009. Now in 2012, it has been counter-validated by one of their students in Australia who has inverted a pancreatic cancer.
