Power (De-type) Seminar

The only effective functional language everyone knows to use is the Aristotelian system of Cause and Effect, a.k.a. the Blame Frame. The downside to this is that they do not know how to use it pre-meditatively and cognitively. This seminar will correct this shortcoming.

Except for Neuro-Semantic Programmers, no one really knows how to use the language structures of the Non-Aristotelian system of Relativity and Relatedness, a.k.a. No-Y-ian Frame, volitionally and fluidly. This seminar will begin the process of correcting this shortcoming for you.

Unless you are a Neuro-Linguistics Programmer you will know nothing about the Meta Model, 2M let alone the Modified Meta Model, 3M.

2M was configured in the Blame Frame; and it was resplendently replete with Implied Causatives. NSP extracted it out of the BF. NSP corrected certain formats that were based on neurological errors. NSP then applied certain critical augmentations and expansions to it. Out of respect to John Grinder and Richard Bandler, the original creators of 2M, NSP decided to name their work 3M.

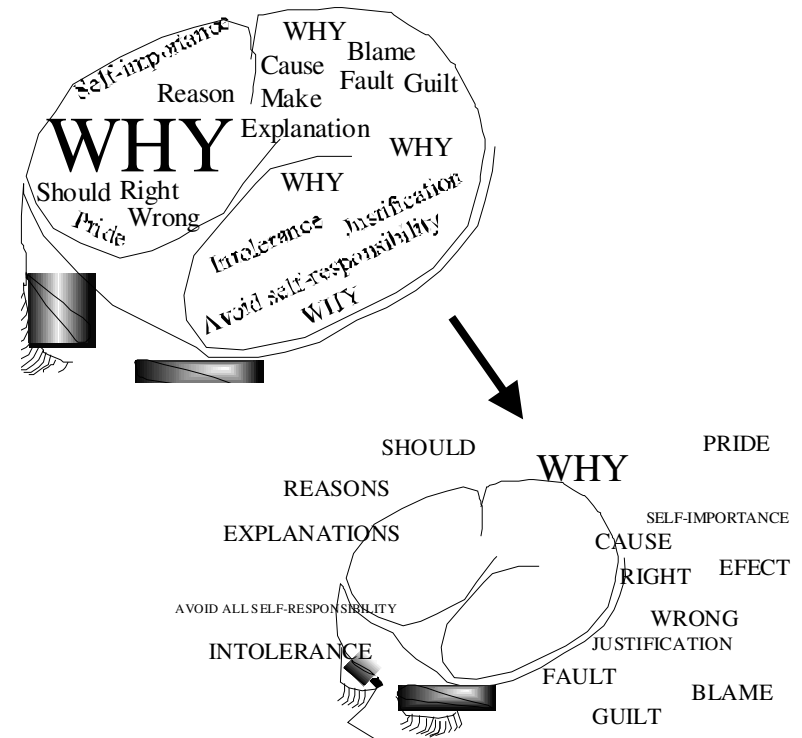

By the 1970s, formal logicians of academia finally faced the reality that Formal Logic had no utility in life. It was obvious to them that the ordinary man, woman and child were using a uniquely different logically system.

They then set out to explore what people were using. In doing so they discovered the field of Informal Logic. You have it but you do not know how to use it premeditatively and volitionally. This shortcoming will end with this seminar.

When you master these 4 languages, you entire reality will change. To help in this process you are to:

1. work in your study groups
2. join the No-Y-ian Tutorial classes

The Desired Outcome of the Power Seminar
